## Education

**Bachelor of Technology, Computer Science** | **CGPA: 8.3**, *BIT Sindri*  
*Dhanbad, Jharkhand*

**Expected Graduation: 2027**

**Class XII** | **Percentage: 92.4%**, *Chinmaya Vidyalaya*  
*Bokaro, Jharkhand*

**2022 – 2023**

## Summary

Full-stack developer with hands-on experience building and shipping production-grade web and mobile applications using **TypeScript**, React.js, Node.js, Express.js, and **PostgreSQL**, supported by **Vite**, **Docker**, and **Jest**. Experienced across the full stack — from REST API design and database modeling to React-based UIs — having built platforms for recruitment management, mobile attendance tracking, and real-time chat, integrating JWT authentication, geofencing, and Socket.IO with message latency as low as **5ms**. Seeking a Full-Stack Developer Internship to contribute to scalable, real-world systems while learning from experienced engineers.

## Technical Skills

**Languages:** TypeScript, JavaScript, C++, Python, Java

**Frontend:** React.js, React Native, Next.js, Vite, Tailwind CSS, NativeWind, HTML, CSS

**Backend:** Node.js, Express.js (Express), REST APIs, JWT Authentication, Socket.IO

**Databases & Cache:** PostgreSQL, MongoDB, MySQL, SQL, Prisma ORM, Redis

**Testing & DevOps:** Jest, Docker, Git, GitHub, Version Control, Linux

**Other Tools:** Firebase, OpenAI APIs, Expo

**Core CS:** Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

## Technical Experience

**Inductly** | *React.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma ORM, Tailwind CSS, Vite, Docker, Jest*

- Built a full-stack recruitment platform in **TypeScript** managing the complete applicant lifecycle from submission through multi-stage evaluations to final induction, with dedicated admin and club-member dashboards.
- Implemented **Role-Based Access Control (RBAC)**, dynamic recruitment pipelines, and configurable evaluation workflows; designed analytics dashboards surfacing conversion ratios and stage-wise applicant distribution.
- Containerized local development database using **Docker**, enabling faster onboarding for new engineers and reducing environment setup time by 75% per developer and wrote **Jest** unit tests for backend logic; used **Vite** for fast frontend builds and HMR.
- Designed a custom **useSaveForm** React hook to debounce and autosave forms via background API requests every 10 seconds, preventing data loss during long-form submissions and creations.

**AttendX** | *React Native, Expo, NativeWind, Express.js, PostgreSQL, Redis, JWT*

- Developed a cross-platform mobile attendance system with role-based access for teachers and students, implementing geofencing-based validation via the **Expo Location API** and the Haversine formula.
- Integrated **Expo Push Notifications** for real-time session alerts and built teacher dashboards with attendance analytics, calendar-based tracking, and manual override controls.

**Chatty** | *MongoDB, Express.js, React.js, Node.js, Socket.IO, JWT, Vite*

- Built a real-time **MERN**-stack chat application with **Socket.IO**, achieving message delivery latency as low as **5ms**, secure JWT authentication, anonymous chatting, and customizable themes.
- Developed advanced filter-based chat retrieval with online/offline status, unread tracking, and blocked-user management, backed by scalable, optimized REST APIs.

## Leadership & Achievements

**Event Management Head**, *Computer Science and Engineering Society, BIT Sindri*

**May 2025 – Present**

- Spearheaded end-to-end organization of a 2-hour seminar on evolving software industry trends driven by AI, drawing an audience of **200–300 students**.
- Managed all logistics including venue booking, scheduling, and program planning, and facilitated active audience participation throughout the session.

## Certifications

- The Complete Generative AI Course (Instructor: Krish Naik) – Udemy
